Content Management

Foryasen, Libunao, Natividad | COM223

01

Problem

What seems to be the Problem?

Algorithmic Opacity and Bias

Creating filter bubbles and echo chambers, sustaining the pre-existing beliefs that reinforce confirmation bias and limit exposure to diverse perspectives.

Case studies from Ikezuruora (2024) and Kanakia, Shenoy, & Shah (2019)

02 Objective

Primary Objective

Category-based feed system

Combine user control and platform-driven content filtering to create a safer, more personalized content experience.

Case studies from Ikezuruora (2024) and Kanakia, Shenoy, & Shah (2019)

03 Scope

Scope

Factors influencing Content Generation

Content coming from textual posts of different users, pages, and groups.

Case studies from Ikezuruora (2024) and Kanakia, Shenoy, & Shah (2019)
